

CompassConnect

Communications with your child's teachers just got easier with Compass Connect!

How does Compass Connect work?

If Compass Connect has been enabled for parents the chat feature can be accessed via the speech bubble icon in the navigation bar.

Parents and carers will be able to create a chat only with teachers who are currently teaching their child, or have taught them in the past.

You will be able to send messages, images and files.

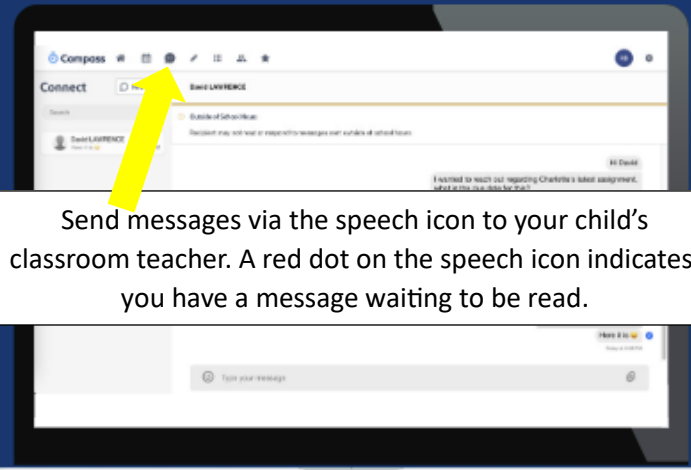

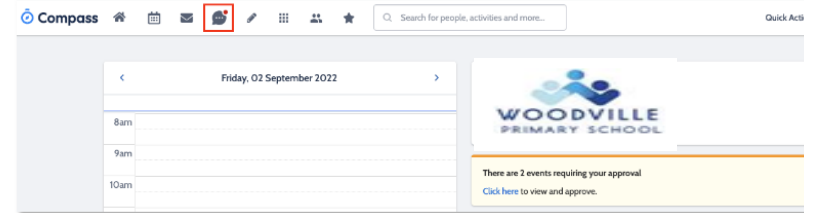

Powering Schools.

compass.education

When a user receives a chat or a reply to a chat, a notification will show on the Connect icon at the top of their Compass screen

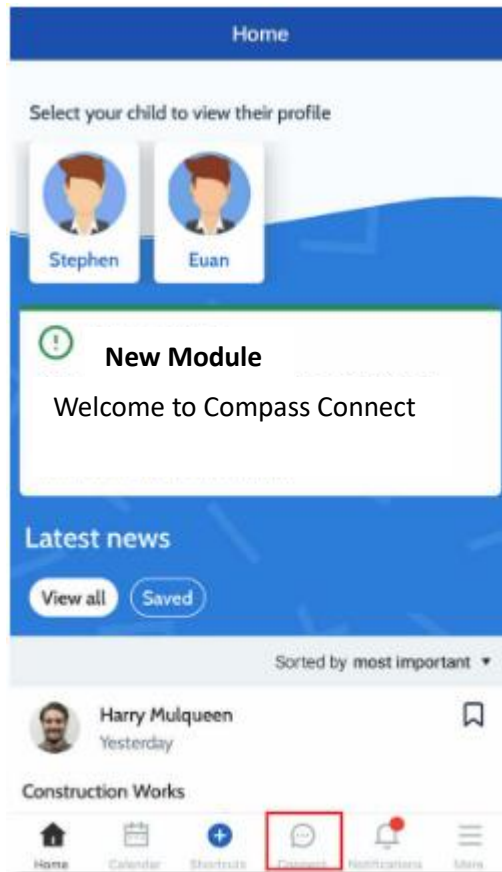

Send messages via the speech icon to your child's classroom teacher. A red dot on the speech icon indicates, you have a message waiting to be read.

Use a channel you are familiar with. Most of us use chat platforms each day to communicate with our friends and family - so why should it be different when reaching out to your child's school?

Parents can also access Compass Connect via the Compass **APP** on your mobile phone.

Please note:

Compass connect is a two-way communication tool between a child's classroom teacher and parent/carer.

This module is new to our families and staff members which will be a learning process together on how to navigate Compass Connect.

If families would like to communicate in one or two sentences with their child's teacher, Compass Connect is the platform to use. If communication required will extend beyond one to two sentences, please engage with a phone call to your child's teacher, make a time to meet with your child's teacher in person or send an email via woodville.ps@education.vic.gov.au.

Due to a teacher's main role being teaching your child, we appreciate your understanding that a teacher will reply to messages sent via Compass Connect within 48 hours (this response time may alter if your teacher is on camp or absent due to illness).

If you require an urgent message to be delivered, please contact the main office direct on 97492770.
